

## **GAS 2.2 Enhancements**

Veeva Professional Services

# GAS 2.2 New Features

---

- Account Summary view for Accounts outside rep Territory
- Contains search **enablement** for Account Name fields
- Ability to specify Maximum accounts to display (instead of hard coding to 20)
- Trim spaces in the search

# Account Summary

# Account Summary View

---

- Custom setting attribute needs to be enabled in `GAS_Hierarchical_Setting__c` to enable this functionality
- Account object Field Sets control what fields to show in the summary – either use default provided in package or create your own
- One default Account field set per Hierarchy Custom setting – however you may create Profile specific or User specific settings and use different summary field sets by User/Profile
- Field Sets support Translation
- Record type developer name can be specified in the Field Set Label to map different summaries for different record types

# Account Summary View

---

- Fieldset Label Naming convention in the Custom setting attribute by default is @@RecTypeDevName@@<optionaltext>. For eg:  
*@@Professional\_vod@@VPROF Default Account Summary*
- In combination with Profile/User specific Custom settings and Rectype naming conventions, the field sets can be assigned similar to Page layout assignments
- Other Custom setting properties control background color, title etc
- Custom setting property to choose which Account field to choose as hyperlink to the summary
- Related list not supported currently

Drag any of the fields above into the list below.

**In the Field Set** ⓘ

- Name
- Account Type
- Primary Parent > Account Group
- Annual Revenue
- Account Phone
- Asst. Phone
- Other Phone
- Record Type ID > Description
- Home Phone
- Specialty

## Other 2.2 Updates

# Contains Search, Search Result Size and housekeeping item

---

- There are two custom setting attributes that allow you to control if you would like a Contains or a Starts With search on Account Name fields (Name, First Name, Last Name):
  - ▶ *GAS Msg Acct StrtsWith Contains* **Label** – This can be any value, but usually should be Starts With for Starts With search and Contains for Contains for Contains search
  - ▶ *GAS Message - Acct SWorContains* **Value** – This can only have one of two values – Starts With OR Contains
- A new custom setting attribute MAX Allowed Distinct Accounts now allows users to specify how many maximum results they would like the search results to show (default is 20). Also ensure the legacy message is appropriately updated (GAS Message - TOO MANY)
- Search criteria is now trimmed so trailing spaces are not impactful

# New/Updated Custom Settings Attributes in v2.2 (GAS Hierarchical Setting)

---

Please note to touch your existing settings so as to grab the default values defined for these new custom settings attributes

- *Enable\_Summary\_View\_\_c*
- *GAS Message - Acct SWorContains Value*
- *GAS Msg Acct StrtsWith Contains Label*
- *MAX Allowed Distinct Accounts*
- *GAS Message - TOO MANY* – The default value of this legacy setting is updated to make it generic
